Project at a Glance

When a family uses a individual toilet, it not only protects them from unhygienic environment their own excreta; it also helps to create a sense of well being and more awareness towards cleanliness. Indeed, there is a big impact on the health of the community as a whole from the overall level of sanitation. As the toilets are covered with walls, it is safe for the person to use mainly women and adolescent girls.

Need Assessment:

Need assessment As the THDCIL is working its CSR activities in its business area surrounding the Tehri Dam, Some ecological restoration and socio economic programs for rural communities are being taken in the rim area after detail studies in this area. A group of villages situated at Upali Ramoli Patti are under extreme and harsh social, economical and ecological conditions and villagers are struggling for their livelihood and daily survival. Deengaoon is one of remote village in Upali Ramoli lying on the northern slope of Tehri Dam and as per survey, it was found that the sanitation system is very poor at the village and they suggested taking up toilet work in this area. THDCIL decided to provide the individual toilet facility to the needy and deprived families of Kharaligaon (Onalgaon) District Tehri and the construction work was implemented through the M/s Girveer Singh Rana, Rishikesh.

Beneficiaries List of villagers for toilet construction (Kharala)

Photos

Out come from the Project:

Individuals were very satisfied with the progress done under CSR project (toilet construction). The only one constraint was observed in the study area that water availability (pipelines are not sufficient) to support the toilets. Even many villagers those are not benefited by scheme urged and requested to be benefited by the scheme in near future.
