Project at a Glance:-

Canals are man-made channels for water, canal cuts across a drainage divide. A canal can be created where no stream presently exists. The water for the canal must be provided from an external source like other streams or reservoirs.

Project affected peoples of village Sain requested to THDCIL to provide facility of Water Canals in their village to solve the water problem for agriculture.

The work was carried out (under supervision of KHEP, Koteshwar) by Shri. Ravindra Singh Sajwan (Contractor) S/o Shri. Chattar Singh Sajwan, village, Pokhri, T.G.

Benefit from the Project:-

After 'completion of the project the residents of village Sain have got benefitted. Now with more and regular availability of water the growing rate of crops in their field has increased and in a way has improved livelihood of locals. The community is now happy.
